12.11.2020

- Fixed a bug where the "View" buttons were shifted

Release 1.2.0

11.05.2020

- Added Discharge Function
- Fixed a bug which caused a Command Header Error on disconnect
- Fixed a bug where System View did not get updates
- Fixed a bug where the System Input caused a Command Header Error
- Improved rescaling of graphs
- Added a configuration file to installer
- Fixed a bug which caused wrong values on the "Setting" and "Protection" knob when a connection attempt was unsuccessful
- Fixed a bug where a changing of the channel was no longer possible.
- Added channel number to .csv files
- Changed values in .csv files to scientific notation
- Fixed a bug where a reconnecting was not possible after a communication loss
- Added default name for .csv files

Release 1.1.0

08.01.2020

Firmware revision equal to AI1.3.x, DI1.3.x, UI1.3.x or higher is obligatory.

- Added System Input feature
- Added a function that saves the last communication setting to allow the user to connect to the device without having to configure the interface settings after every program start.
- Fixed a Save/Recall bug
- Fixed a bug where leading zeros of an IP address would cause an error
- Improved general optical appearance and added new company icon
- Fixed a bug where not all data of the data viewer got exported to excel
- Fixed a bug with formatting voltage and current in the system view.
- Fixed a bug where a reset would cause scale errors on the setting and protection controls
- Fixed a bug where the system view got cropped at minimal window resolution
- Fixed a bug where resizing the window would lead to list editor- and data viewer graph to interleave with the window border
- Fixed a bug where a rescaling of the history chart could lead to an overlap with nearby buttons.

Release 1.0.0

17.07.2017

- Initial Release
